

Protein Biomarkers – Discovery to Validation

Tissue Imaging-New Techniques

Thursday May 1st
Cannon Research Center, CMCC
Small Conference Room
 1542 Garden Terrace
 Charlotte, NC

Join us for this free and informative session right at your facility. Learn about enabling workflows from Applied Biosystems|MDS Sciex experts in this interactive and educational workshop.

Application scientists will be on hand to directly answer your questions, and there will be valuable information for both new users and advanced experts.

Explore Solutions which can benefit your lab

- Targeted Analysis for maximum sensitivity and specificity
- Increased throughput and confidence in results with labeling strategies
- Ask questions in an interactive, open discussion format

Agenda (2:00 – 4:30)

TIME 2:00- 3:15p.m. Biomarker Identification: Intelligent Data Acquisition and Processing: The Key to Optimum Results. Biomarker Verification: Hypothesis Driven Strategies Characterization and Quantitation.

TIME 3:15- 3:30p.m. Coffee break

TIME 3:30- 4:30p.m. New Solutions for Molecular Imaging Using Mass Spectrometry
